A User Experience and User Interface Designer in continual employment at ClearCourse Membership Services (APT Solutions prior to their acquisition).

My main area of focus is in ensuring accessibility in apps and websites, and more generally in interface & web design. With 7 years and counting in the Web industry and a focus on Human-centred User experience design, I have a background and continued interest in Psychology and Computer Science that help inform and contextualise my skills, specifically an interest in the applications of Behavioural Theory in Visual Design.

I'm a big advocate for LGBTQIA+ & Disability representation, I believe that designing for the minority of users first improves the experience for all & I bring a perspective that doesn't consider these groups solely as an afterthought.

I'm an animal lover and when I'm not at work I'm either reading, gardening, running DnD or modding video games.

Date	Employment	Education	
2023	UI Designer @ ClearCourse (Jan 2021- Oct 2023)	Naidex Disability Conference 2023 @ Birmingham NEC
